Summary

Fresh Computer Science graduate passionate about building software across multiple platforms, demonstrated by hands-on experience shipping a deployed Flutter application featuring OCR and BLoC architecture. With foundational knowledge of Python and PHP, alongside actively mastering React to bridge mobile and web development. Eager to transition from independent projects to a collaborative team environment, bringing a fast learning curve and a commitment to writing clean, testable code.

Education

Bachelor of Science in Computer Science

Philippine College of Science and Technology

Aug 2022 - June 2026

Certifications

TESDA NC II: Computer Systems Servicing

July 2024

Practical Experience

Independent Developer

- Developed and deployed a Flutter/Dart thesis android app utilizing BLoC architecture and OCR.
- Developed a dynamic Flutter POS/payroll system with barcode scanning and a custom Supabase activation workflow.
- Built a Flutter music app with OTP login, device alerts, and Firebase cloud storage.

IT Support Intern (OJT)

- Assisted with PC assembly, laptop hardware and printer diagnostics, and network cabling.

Skills

- **Languages:** Python, PHP, Dart
- **Technologies & Platforms:** MySQL, Flutter, Firebase, Supabase, BLoC State.
- **Development Concepts:** CRUD Operations, Custom Authentication Workflows, Web UI Design via Figma.
- **Tools & Environments:** VS Code, Git and GitHub.
- **Hardware & IT:** PC Assembly, OS Installation, VMware, Network Cabling, TESDA NC II Computer Systems Servicing
